EDUCATION

University of Wisconsin-Madison, College of Letters and Science, Madison, WI

2019 – 2023

Bachelor of Science in Mathematics and Computer Science

- GPA: 3.6/4.0, Dean's List
- Key Coursework: Operating Systems, Programming Languages, AI, Networks, Modern Algebra, Cryptography, Databases

PROFESSIONAL EXPERIENCE

DevRev, Austin, TX

Jun 2022 – May 2023

Member of Technical Staff Intern

- Created and maintained API SDK in Golang, Python, and Typescript for the development of cloud-based software using AWS/GCP/Azure-provided services.
- Increased efficiency of internal group analysis by 80% through deploying a microservice that automated summarization and publishing of customer call transcripts.
- Optimized a transformer model and performed data analysis for an NLP project using R and Python scripts.

University of Wisconsin-Madison, Madison, WI

Sep 2021 – May 2022

Calculus Teaching Assistant

- Conducted weekly individual and group office hours to provide personalized assistance with homework and exam preparation to the class of 95 students.
- Developed course materials and evaluated exam complexity by researching and identifying common challenges among 6 similar courses.
- Delivered lectures and presentations to 25 students and utilized feedback to improve classroom engagement and knowledge retention.

Torchlight Intelligence, Madison, WI

Jun 2020 – Aug 2020

Junior Software Developer

- Developed, maintained, and optimized 5 website applications utilizing various programming tools and languages including jQuery, JSON, Bootstrap, HTML/CSS, and JavaScript resulting in improved user experience and 15% traffic increase.
- Integrated artificial intelligence and machine learning algorithms into an outsourced application, improving its functionality and efficiency.
- Implemented agile methodologies and version control tools such as GitHub and Jira to streamline the development process.

PROJECTS

Datathon

Nov 2022

Hackathon by Data Science Club, UW-Madison

- Collaborated in a team of 4, competed in a programming project contest, pitted against more than 100 students.
- Advanced to the final round and ranked among the top five finalists.
- Developed a React application with Java implemented backend to assist with academic planning and course management, improving the efficiency of the educational process.

HackMIT

Sep 2022

Hackathon by MIT

- Collaborated with a team of 4 individuals in a highly competitive 24-hour programming project, competing against over 1000 students from top schools nationwide.
- Developed an application focused on ensuring medical safety and spreading awareness of COVID-19 cases in local areas.
- Incorporated AI into a web app that utilized JavaScript, R, Python, and frameworks including MongoDB and AWS Cloud.

TECHNICAL SKILLS

- Programming languages: Java, Python, JavaScript, Typescript, Golang, SQL, R, HTML/CSS
- Frameworks: Docker, Terraform, Kubernetes, AWS Lambda, gRPC, Kafka, Linux-based software
- Version-control and agile tools: GitHub, JIRA
